

KISELGUR FORTE

DIATOMACEOUS EARTH

**VITAMINS
& MINERALS**

Skin & Coat

Hooves

For healthy skin,
coat and hooves

SILICON DIOXIDE

APPLICATION

To be used when the silicon content of the feed fails to meet the horse's requirements. Enhances the quality of hooves, coat, and skin.

- 100% pure silicon in powder form
- Promotes a healthy coat and hooves
- Strengthens cartilage, joints and connective tissue

Eclipse Biofarmab Kiselgur Forte comprises 100% silicon dioxide, completely organic and sourced from Scandinavian mines.

Diatomaceous earth or silicon dioxide is a good source of silicon, which is considered beneficial for hooves and coat.

Research indicates that a horse's demand for silicon increases during training and competition. Enhancing the horse's health and agility can be achieved by supplementing with extra silicon.

Silicon is a prevalent element present in the body's cartilage, connective tissue, tendons, and joints. Diatomaceous earth plays a crucial role in the development and upkeep of robust bones and joints. It contributes to the bone structure's hardness and density, which is critical for maintaining the horse's overall skeletal well-being.

Silicon strengthens connective tissues, which is vital for supporting a horse's joints, tendons, and ligaments. This is particularly important for sport horses regularly subjected to physical demands.

FEEDING DIRECTIONS

Pony: 0.5 scoop/day

Horse: 1 scoop/day

Large-sized horse (over 600kg): 1.5 scoops/day

Mix well in feed.

1 scoop = 3 g provides 1.25 g silica.

SIZES AVAILABLE

0798 500 g = 166 days supply at 3 g/day

0797 2 kg = 666 days supply at 3 g/day

COMPOSITION

Pure Diatomaceous Earth.

ADDITIVES

The product contains no additives.

ANALYTICAL CONSTITUENTS

Silicon 35%, Calcium 1%, Sodium 0,3%, Phosphorus 0%.

SHELF LIFE

60 months.
