HEALTHY HOOVES

APPLICATION

To be used for supporting hoof growth and quality, and also suitable for preventive purposes.

- Strengthens and improves horn growth
- Biotin 30 mg/day
- Biotin, diatomaceous earth, MSM and prebiotics

Hoofbuilder is a complementary feed designed specifically for horses, featuring a unique blend of nutrients proven to significantly enhance hoof growth and quality. It also includes prebiotics that promote a healthy intestinal flora.

Horses commonly contend with hoof issues, including cracks, weakened hoof walls, and slow growth. A horse's hooves are influenced by various factors, including its environment, genetic heritage, and the demands of its activities. While some horses thrive without the need for shoes, regrettably, there are many other who, despite wearing them, still encounter significant problems.

The paramount concern is to ensure that the horse receives an ample supply of the essential "building blocks" necessary for the formation of healthy hoof horn. Regrettably, this is not always the case, given that the nutritional content of regular feed may at times fall short of adequacy.

To effectively absorb nutrition, the presence of a beneficial intestinal flora composed of "friendly" microorganisms is essential. Hoofbuilder contains both Diamond V, a fermented yeast culture, and inulin to maximise the efficiency of nutrient absorption.

Biotin and MSM (methylsulfonylmethane) form a highly effective combination with synergistic benefits, promoting accelerated growth and playing a pivotal role in the development of the hoof wall. Alongside diatomaceous earth, MSM aids in enhancing hoof strength and durability. Furthermore, biotin and diatomaceous earth are vital for the formation of healthy skin cells.

Keep in mind that hoof supplements need to be administered for an extended duration before results become apparent. The supplementary nutrients can influence the newly formed hoof horn exclusively, and since horn growth initiates from the crown edge, it may take up to a year before improvements become visible.

FEEDING DIRECTIONS

Pony: 1 scoop/day

Horse: 1.5 scoops/day

Large-sized horse (over 600kg): 2 scoops/day

Mix well in daily feed.

1 scoop = 20 g.

SIZES AVAILABLE

0938 900 g = 30 days supply at 30 g/day

0939 1.8 kg = 60 days supply at 30 g/day

COMPETITION WAITING PERIOD

96 hours (Sweden).

COMPOSITION

Fermented Yeast 46%, Methylsulfonylmethane (MSM) 21%, Diatomaceous Earth 10%, Inulin 18%.

ADDITIVES

Vitamins:

Biotin

1000 g

30 g

1000 mg

30 mg

ANALYTICAL CONSTITUENTS

Crude Protein 8.2%, Crude Oils and Fats 1.5%, Crude Ash 12%, Crude Fibre 3.6%, Sodium 0.2%.

SHELF LIFE

24 months.
