Muscles

Organic sulfur for
the horse's muscles,
tendons and ligaments

ORGANIC SULFUR

APPLICATION

To be used to promote the health of hooves, muscles, tendons, and ligaments. Also a vital constituent in the structural makeup of the body's cells.

- Supports the immune system
- Vital for numerous bodily functions
- 100% pure, top-quality MSM

Eclipse Biofarmab MSM 100 consists of 100% high-quality MSM.

While grass is a primary MSM source for horses, its content significantly reduces in dried hay and is nearly absent in hay silage. Therefore, a horse that grazes for a few hours a day and is primarily fed hay silage receives minimal MSM in its diet. The demand for MSM also rises with increased activity and age. In horses, MSM is commonly used to support muscle recovery after strenuous exercise and to promote flexibility and mobility.

MSM plays a crucial role in numerous bodily processes and is essential for a variety of functions. It contributes to the elasticity and permeability of cell membranes, facilitating the absorption of nutrients and oxygen by cells, while aiding in the efficient removal of waste products. Additionally, several B vitamins rely on MSM for their proper utilisation.

MSM is also a crucial component in cell formation throughout the entire body. It is involved in the construction of various essential structures, including cartilage, tendons, connective tissue, muscles, bones, and fur. Moreover, it serves as a key building block for the body's synthesis of amino acids, proteins, enzymes, and hormones. Organic sulfur, found in every cell of the body, is undeniably one of the most crucial components for overall bodily function.

MSM can be administered to horses without the risk of overdose.
Important: MSM 100 has a 96-hour competition waiting period in Sweden.

FEEDING DIRECTIONS

One scoop twice daily for a period of 10 days:

Pony: 1 scoop

Horse: 2 scoops

Large-sized horse (over 600kg): 3 scoops

Subsequently, one scoop once daily:

Pony: 0.5 scoop

Horse: 1 scoop

Large-sized horse (over 600kg): 1.5 scoops

Mix well in feed.

1 scoop = 10 g

Shelf life: 24 months.

Competition waiting period: 96 hours (Sweden).

SIZES AVAILABLE

0996 500 g = 50 days supply at 10 g/day
1216 1 kg = 100 days supply at 10 g/day

COMPOSITION

MSM (Methyl Sulfonyl Methane).

ADDITIVES

The product contains no additives.

ANALYTICAL CONSTITUENTS

Crude Protein 0%, Crude Oils and Crude Fats 0%,
Crude Ash 0.05%, Crude Fibre 0%, Sodium 0%.
