SPRAY FOR LEATHER CARE

APPLICATION

To be used for the maintenance and conditioning of leather gear. This is an emollient, deep-acting, and water-repellent leather oil.

- Extends the durability of leather items
- Protects and preserves leather integrity
- Convenient spray bottle design for easy application

Eclipse Biofarmab Leather Oil stands as a premium solution, meticulously crafted for the natural and efficient care of all leather items.

Its unique formula is tailored for effortless spray application, guaranteeing uniform coverage. This method achieves unparalleled access to the most intricate seams and crevices, surpassing traditional application techniques with cloths or sponges.

This leather oil is engineered for rapid absorption, delivering a profound moisturising effect that penetrates deep into the leather. Its effectiveness extends beyond merely enhancing the leather's look; it significantly contributes to its enduring resilience.

Moreover, this oil forms a robust water-repellent shield, safeguarding the leather from moisture, thereby prolonging its lifespan.

To use, simply mist the oil across the leather's surface, allow it to settle briefly, and then gently remove any surplus with a soft, dry cloth.

What sets Eclipse Biofarmab Leather Oil apart is its ability to be fully absorbed by the leather, eliminating any residue or coating. The outcome is leather that not only appears meticulously maintained but also maintains its inherent suppleness and strength over time.

INSTRUCTIONS FOR USE

First, ensure the leather is clean before applying any treatment. Liberally spray the leather oil over the entire surface you wish to treat. Allow it to dry for 5 to 10 minutes. After drying, gently remove any excess oil by wiping with a soft, dry cloth.

SIZES AVAILABLE

1043 400 ml
