FLAVOURING & WASHING

APPLICATION

To be used for flavouring water, washing horses, supporting metabolism, and promoting a healthy intestinal flora.

- Premium-quality pure apple cider vinegar
- Versatile: supplement and for washing horses
- Contains natural minerals and trace elements

Eclipse Biofarmab Apple Cider Vinegar is made from 100% pure food-grade apple cider vinegar, retaining all the beneficial properties of this natural ingredient.

Apple cider vinegar is a versatile product with multiple applications:

Flavouring: It can be used to flavour water for horses that frequently travel, ensuring consistent taste in their drinking water.

Hoof bath: Apple cider is advantageous for use as a hoof bath, particularly for addressing issues like beam rot.

Washing: It is an excellent choice for washing horses due to its low pH, which creates an unfavourable environment for bacteria.

While many are aware of the health benefits of apple cider vinegar for humans, its long-standing history as a nutritious feed supplement for horses remains less known. While there are books dedicated to its human benefits, its significance for equine nutrition is often overlooked.

Apple cider vinegar offers horses a rich source of natural minerals and trace elements derived from sun-ripened apples. Traditionally, it is believed that horses benefit from improved nutrient absorption when supplemented with apple cider vinegar.

This enhanced well-being can manifest in various ways, including a healthier, shinier coat.

FEEDING DIRECTIONS

As a feed supplement:

Mix 25–50 ml thoroughly with feed, twice daily.

As water flavouring:

Ideal for horses on the go. Mix 25 ml in approximately 10 l of water at home and during travel. This ensures that the water maintains the same taste.

For washing:

Mix 1 dl in approximately 10 l of water. Use a sponge to apply mixture to horse's coat, ensuring even coverage. Afterward, scrape off excess water.

SIZES AVAILABLE

1195 5 l = 100 days supply at 50 ml/day

COMPOSITION

100% pure, premium-quality apple cider vinegar.

ADDITIVES

The product contains no additives.

ANALYTICAL CONSTITUENTS

Crude Protein 0%, Crude Fibre 0.01%, Crude Oils and Fats 0.01%

SHELF LIFE

24 months.
