HIGHLY CONCENTRATED GLUCOSAMINE

APPLICATION

To be used for the support and care of tendons, joints, and cartilage. Ideally administered to maintain mobility.

- Glucosamine Hydrochloride (HCl)
- L-methionine, Vitamin C, manganese
- Crucial for tendon, joint, and cartilage formation

Eclipse Biofarmab BioGlucomin contains a high concentration of glucosamine with exceptional absorption capacity. It also includes inulin and L-methionine, making it ideal for older dogs and cats, as well as those exposed to heavy exertion.

Glucosamine is a vital natural compound that plays a crucial role in the development of tendons, joints, and cartilage. As age advances or during intense exertion, the body's inherent capacity to produce sufficient amounts of glucosamine diminishes.

Incorporating manganese enhances the process of cartilage regeneration. Furthermore, we have included methionine, a readily absorbable sulfur source essential for cartilage formation.

Additionally, the inclusion of inulin, a metabolic dietary fibre (prebiotic) promotes the cultivation of a health intestinal flora, optimising conditions for effective absorption in the intestines.

The glucosamine utilised in Eclipse Biofarmab's products is in the form of Glucosamine Hydrochloride (HCl).

FEEDING DIRECTIONS

>10 kg: 2 scoops/day
10-30 kg: 3 scoops/day
>30 kg: 4 scoops/day
Mix well in feed.
1 scoop = 1 g

SIZES AVAILABLE

1291 150 g = 75 days supply at 2 g/day

SHELF LIFE

24 months.

COMPOSITION

Glucosamine HCl 47%, Inulin.

ADDITIVES

	1000 g	2 g
Vitamins:		
E 302, 3a300 Vitamin C	16.5 g	33 mg
Amino acids:		
3.1.1 3c301 Methionine	67 g	133 mg
Trace elements:		
E5 Manganese (Manganous Sulfate)	2.5 g	5 mg

ANALYTICAL CONSTITUENTS

Crude Protein 21.4%, Crude Ash 1.52%, Crude Fats and Crude Oils 0.36%, Crude Fibre <0.5%, Sodium 0%.
