MASSAGE LINIMENT

APPLICATION

To be used as a massage liniment for the horse's muscles, joints, and tendons, enriched with Devil's Claw extract.

- Gel-based Devil's Claw liniment
- Ingredients sourced from certified producers
- Ideal for massaging both muscles and joints

Eclipse Biofarmab Devil's Claw Gel is a potent liniment gel, infused with high-grade Devil's Claw extract, renowned for its deep-acting properties.

Devil's Claw (*Harpagophytum procumbens*) is an African herb primarily found in South Africa and Namibia. It belongs to the sesame genus, and its dried fruit bears a resemblance to a claw.

With growing interest in its health benefits, there has been a surge in demand, sparking discussions on the conservation of this wild species. Eclipse Biofarmab is committed to sustainability, sourcing its Devil's Claw exclusively from certified producers.

When your horse feels a bit stiff and in need of a soothing, relaxing massage, this gel is a great option.

Devil's Claw is not suitable for use on pregnant mares due to its uterine stimulation properties. Avoid application on open wounds or damaged skin to prevent irritation.

Important: Devil's Claw has a 96-hour competition waiting period in Sweden.

INSTRUCTIONS FOR USE

Thoroughly massage into the affected area. Can be used with or without bandages.

For external use only.

COMPOSITION

Extract of Devil's Claw root (*Harpagophytum procumbens*), Gel Foundation.
