

PSYLLIUM HUSK

PSYLLIUM HUSK

**DIGESTION &
GUT HEALTH**

General health

To assist the horse's
gut in removing
sand, soil, and gravel

FLEA SEED SHELLS

APPLICATION

To be used for horses that frequent sandy paddocks or may ingest sand, pine cones, soil, or gravel.

- 100% psyllium seed (flea seed) shells
- Reduces the risk of sand colic
- Forms a gel in the horse's stomach to expel sand and gravel

Eclipse Biofarmab Psyllium Husk contains 100% psyllium husk, also called flea seed shells.

Psyllium Husk is a supplementary feed designed for horses exposed to sandy paddocks or those prone to ingesting sand, pine cones, soil, or gravel.

Psyllium Husk consists of psyllium seed shells with a high fibre content. Upon contact with liquid, psyllium seed shells form gel-like fibres that assist in the removal of sand, soil, and gravel from the intestine.

The flea seed shell also promotes healthy bowel movements and supports overall intestinal function.

It is best administered with wet food at the time of feeding. It can also be given in its dry form, but it is essential to ensure the horse has unrestricted access to water. The product should not be soaked, as the desired gel formation occurs inside the horse for optimal effectiveness.

As this product is composed of natural ingredients, variations in colour and appearance are normal.

FEEDING DIRECTIONS

For maintenance:

1.5 scoops daily for up to 30 days

For therapeutic use:

1.5 scoops twice daily for up to 30 days

Mix dry with feed. Ensure that the horse has unrestricted access to water.

1 scoop = 30 g

SIZES AVAILABLE

601606 4 kg = 88 days with 45 g/day

SHELF LIFE

24 months.

COMPOSITION

100% Psyllium Seed Husk.

ADDITIVES

The product contains no additives.

ANALYTICAL CONSTITUENTS

Crude Ash 2.8%, Crude Protein 16.9%, Crude Fat and Crude Oil 6.1%, Crude Fibre 20%.
