gastrointestinal system

WHOLE PSYLLIUM SEEDS

APPLICATION

To be used for supporting a healthy gastrointestinal system and normalize stools in stressful situations.

- 100% psyllium seeds (flea seeds)
- Can promote good intestinal function
- Can help to stabilize bowel movements

Eclipse Biofarmab Psyllium Seed for dogs and cats contains 100% premium quality psyllium seeds, also called flea seeds.

The outer shell of the psyllium seed forms a gel-like substance upon contact with liquids. Psyllium can assist your pet in various ways and has several different uses.

- It can be given to restless dogs and cats who pick up whatever they find on walks, in the garden, and at home, as the psyllium gel helps to remove this unwanted material from the intestine.
- To regulate bowel movements in stressful situations such as car rides, environmental change and visits to the vet, but also during intense physical activity like hunting, competitions, training, etc. Psyllium indeed binds water, preventing the pet from sudden diarrhoea caused by stress and vigorous exercise.
- If the animal is constipated, psyllium helps to lubricate, stimulate intestinal movement, and carries water into the intestine, aiding the stool to return to a normal consistency.
- Psyllium can also be given to support and enhance a healthy gastrointestinal system in general.

Psyllium is best administered with wet food immediately following feeding. It can also be given in its dry form, but it is essential to ensure the pet has unrestricted access to water. The product should not be soaked, as the desired gel formation occurs inside the pet for optimal effectiveness.

As this product is composed of natural ingredients, variations in colour and appearance are normal.

FEEDING DIRECTIONS

For maintenance.

>10 kg: 0.5 scoop/day

10-30 kg: 1 scoop/day

<30 kg: 1.5 scoops/day

Mix well in feed.

1 scoop = 10 g

SIZES AVAILABLE

603680 300 g = 60 days supply at 5 g/day

COMPOSITION

100% Psyllium Seed (*Plantago ovata*).

ADDITIVES

The product contains no additives.

ANALYTICAL CONSTITUENTS

Crude Ash 2.8%, Crude Protein 16.9%, Crude Fat and Crude Oil 6.1%, Crude Fibre 20%.

SHELF LIFE

24 months.
