

BIOSUN SPF 50
SUN PROTECTION MOUSSE

CARE & GROOMING | Skin & Coat | Pharmacy | Sun protection mousse for exposed areas of skin

SUNPROTECTION

APPLICATION
For sun protection on exposed areas of the horse's skin, such as the muzzle, blaze and other areas with little pigmentation.

- **High sun protection – SPF 50**
- **pH-balanced for the horse's skin**
- **High water resistance**

Eclipse Biofarmab BioSun SPF 50 is a lightweight, easy-to-apply sun protection mousse, specially developed for exposed areas of the horse's skin during periods of sun exposure. SPF 50 provides a high level of sun protection during sunny periods.

Horses with pink skin and white markings are more susceptible to the effects of the sun, making effective sun protection particularly important on areas such as the muzzle, blaze and other areas with little pigmentation.

The light, soft mousse is easy to apply and absorbs quickly without leaving a sticky residue. The pH-balanced formula is adapted to the horse's skin, making it well suited for regular use.

BioSun is highly water-resistant, helping the product stay in place when the skin comes into contact with water, for example during light rain or when the horse is drinking.

Apply before sun exposure and reapply as required to maintain protection.

INSTRUCTIONS FOR USE
Apply to exposed areas before sun exposure and reapply as required to maintain protection.

Shake before use. Hold the can upside down during use.

For external use only.
Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.

COMPOSITION
Butane, Butyl Methoxydibenzoylmethane, Ethylhexyl Triazone, Ethylhexyl Methoxycinnamate, Glycerin, Isobutane, Propane.

SHELF LIFE
24 months.
