## DEEP-ACTING

### APPLICATION

For cleansing the coat and providing extra care for muscles, tendons and ligaments after exercise.

- Effective and gentle
- Based on arnica extract and eucalyptus oil
- No rinsing required

Eclipse Biofarmab Liniment Shampoo combines effective, gentle cleansing with a deep-acting liniment, specially developed for the horse's muscles, tendons and ligaments after strenuous exercise. Based on arnica extract and eucalyptus oil, two well-known ingredients traditionally used in muscle care.

After exercise, the horse can benefit from a shower to remove sweat and dirt from the coat. Massage the shampoo over the body, paying particular attention to larger muscle groups and areas that have been under greater strain during exercise. The massage may help stimulate local blood circulation while also providing an opportunity to check the horse's muscles and legs. The shampoo can also be used as a leave-on application. Massage the product in, then remove excess water with a sweat scraper without rinsing, allowing the liniment to work for longer.

### Two ways to use Liniment Shampoo

#### Option 1:

Rinse the horse with lukewarm water. Massage the shampoo in thoroughly, then rinse off with water.

#### Option 2:

Rinse the horse after exercise. Mix Liniment Shampoo with water according to the recommended dosage and massage the mixture into the desired areas. Remove excess water with a sweat scraper.

Store frost-free with a well-closed lid, not above normal room temperature. Should not be exposed to direct sunlight. Only for external use. Keep out of reach of children. Avoid contact with eyes and sensitive skin.

### INSTRUCTIONS FOR USE

**Option 1:** Rinse the horse thoroughly, massage in the shampoo and rinse the horse.

**Option 2:** Rinse the horse thoroughly. Mix 1:10 with water, massage in the mixture, scrape off any excess wash water.

For external use only.

### COMPOSITION

Arnica Extract, Eucalyptus Oil, Laureth, Oxetals, Glycerol, Sodium Chloride.

### SHELF LIFE

36 months.
