

SAFETY DATA SHEET

Liniment Shampoo

The safety data sheet complies with Commission Regulation (EU) 2020/878 of 18 June 2020 amending Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

SECTION 1: Identification of the substance / mixture and of the company / undertaking

Issue date	01.09.2026
------------	------------

1.1. Product identifier

Product name	Liniment Shampoo
Article no.	1738, 1740
GTIN no.	7330824017391, 7330824017407

1.2 Relevant identified uses of the substance or mixture and uses advised against

Area of use	Shampoo for horses
Uses advised against	No specific uses advised against have been identified.
Consumer use	Yes

1.3 Details of the supplier of the safety data sheet

Company name	Willab AB
Visiting address	Hålarpsvägen 15
Postal address	Hålarpsvägen 15
Postcode	26962
City	Båstad
Country	Sweden
Telephone	0431445900
Email	info@willab.se
Website	www.willab.se

1.4. Emergency telephone number

Emergency telephone	Telephone: Call 112 in an emergency and ask for poison information. Open 24 hours a day. Less urgent: Call 010-456 6700. Open 24 hours a day. See Section 4 for first-aid measures.
---------------------	---

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Additional classification information	No classification
---------------------------------------	-------------------

2.2. Label elements

2.3. Other hazards

General hazard description	This mixture/product contains no substances considered to meet the criteria for classification as PBT and/or vPvB substances. The product contains no substances assessed as endocrine disruptors according to the criteria in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605.
----------------------------	--

SECTION 3: Composition/information on ingredients

3.2. Mixtures

Type of composition		Mixture		
Substance	Identification	Classification	Content	Notes
Eucalyptus oil	CAS No.: 8000-48-4 EC No.: 616-775-9	Flam. Liq. 3; H226 Skin Irrit. 2; H315 Skin Sens. 1; H317	0.1 - 1 %	
Arnica extract			5 - 10 %	
Triethanolamine	CAS No.: 102-71-6 EC No.: 203-049-8		0.01 - 0.1 %	

SECTION 4: First aid measures

4.1. Description of first aid measures

General	In case of accident: Contact a doctor or emergency department - bring the label or this safety data sheet. If symptoms persist or if there is any doubt about the affected person's condition, seek medical attention. Never give an unconscious person water or similar.
Inhalation	In case of breathing difficulties or respiratory irritation: Move the affected person immediately to fresh air and keep under observation.
Skin contact	In case of irritation: Wash off the product. If irritation persists: contact a doctor.
Eye contact	In case of eye irritation: Remove any contact lenses. Rinse immediately with water (20-30 °C) for at least 5 minutes. Seek medical attention.
Ingestion	Give the person plenty to drink and keep under observation. In case of nausea: Contact a doctor immediately and bring this safety data sheet or the product label. Do not induce vomiting unless recommended by a doctor. Lower the head so that any vomit does not flow back into the mouth and throat.

Recommended personal protective equipment for first-aiders

None.

4.2 Most important symptoms and effects, both acute and delayed

General symptoms and effects

Not specified.

4.3 Indication of any immediate medical attention and special treatment needed

Medical treatment

Bring this safety data sheet or the product label.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

Fight the fire in the usual manner from a safe distance.

5.2 Special hazards arising from the substance or mixture

Fire and explosion hazards

Dense smoke is produced in a fire. Exposure to decomposition products may constitute a health hazard. Closed containers exposed to fire should be cooled with water. Do not allow fire-fighting water to enter drains or waterways. If the product is exposed to high temperatures, e.g. in the event of fire, hazardous decomposition products may form.

Hazardous combustion products

Carbon oxides (CO / CO₂)

5.3. Advice for firefighters

Personal protective equipment

None.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Protective equipment

None.

6.2. Environmental precautions

Environmental precautions

Avoid release to the environment.

6.3. Methods and material for containment and cleaning up

Containment

Spillage must be contained and collected with granules or similar material and disposed of in accordance with the provisions on hazardous waste.

Clean up

Use sand, diatomaceous earth or similar material to collect liquids.

Other information

Always contact the local fire service in the event of large spills. Cleaning should be carried out as far as possible with cleaning agents. Solvents should

be avoided

6.4 Reference to other sections

Other information

See Section 13 "Disposal considerations".
See Section 8 "Exposure controls/personal protection" regarding personal protection.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Handling

Smoking, eating and drinking are not permitted in work areas.
See Section 8 regarding personal protection.

7.2 Conditions for safe storage, including any incompatibilities

Storage

Store in tightly closed containers and protect from moisture and sunlight.
Containers must be dated when opened and tested regularly for the presence of peroxides.
Do not exceed storage time limits.
Opened containers must be resealed carefully and stored upright to prevent leakage.

Conditions for safe storage

Compatible packaging

Always store in containers made of the same material as the original container.

7.3 Specific end use(s)

Recommendations

This product should only be used for the uses described in Section 1.2

Substance

Triethanolamine

Recommendations

Keep out of reach of children.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Substance	Identification	Limit values	Year
Triethanolamine	CAS No.: 102-71-6	Limit value type: OEL 8-hour limit value: 0.8 ppm Short-term exposure limit (STEL) Value: 1.6 ppm	
Control parameters, comments	Triethanolamine Short-term exposure limit (15 minutes) (ppm): 1.6 Short-term exposure limit (15 minutes) (mg/m³): 10 8-hour limit value (ppm): 0.8 8-hour limit value (mg/m³): 5 Notes: H = The substance can readily be absorbed through the skin. V = Indicative short-term exposure limit.		

Swedish Work Environment Authority regulations and general advice on occupational exposure limits (AFS 2018:1) and later amendments AFS 2020:6 and AFS 2021:3.

8.2 Exposure controls

Safety measures to prevent exposure

Appropriate engineering controls	Compliance with occupational exposure limits should be checked regularly. Smoking, eating and drinking are not permitted in work areas.
Product-related measures to prevent exposure	No exposure scenarios have been implemented for this product
Organisational measures to prevent exposure	Professional users are subject to occupational health and safety legislation on maximum concentrations during exposure. See the occupational exposure limits above.
Engineering measures to prevent exposure	Vapour formation must be kept to a minimum and below current limit values (see above). Installation of local exhaust ventilation is recommended if normal airflow in the workroom is insufficient. Ensure that eyewash and emergency shower facilities are clearly marked.

Eye / face protection

Required properties	Use only CE-marked protective equipment. No special protection required during normal and intended use.
---------------------	---

Hand protection

Skin / hand protection, short-term contact	No special protection required during normal and intended use.
--	--

Skin protection

Suitable protective clothing	No special protection required during normal and intended use.
------------------------------	--

Respiratory protection

Respiratory protection, general	Respiratory protection is not required if ventilation is adequate.
---------------------------------	--

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Physical state	Liquid
Colour	Red.
Colour intensity	Transparent.

Odour	Eucalyptus
pH	Value: 6 - 7

9.2. Other information

SECTION 10: Stability and reactivity

10.1 Reactivity

10.2 Chemical stability

Stability	The product is stable under the conditions specified in Section 7 (Handling and storage).
-----------	---

10.3 Possibility of hazardous reactions

10.4 Conditions to avoid

10.5. Incompatible materials

Materials to avoid	Strong acids, strong bases, strong oxidising agents and strong reducing agents.
--------------------	---

10.6 Hazardous decomposition products

SECTION 11: Toxicological information

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Substance	Triethanolamine
Acute toxicity	Tested effect: LD50 Route of exposure: Oral Value: 6400 mg/kg bw Test animal species: Rat

11.2 Information on other hazards

SECTION 12: Ecological information

12.1 Toxicity

12.2 Persistence and degradability

12.3 Bioaccumulative potential

12.4 Mobility in soil

12.5 Results of PBT and vPvB assessment

Results of PBT and vPvB assessment	This mixture/product contains no substances considered to meet the criteria for classification as PBT and/or vPvB substances.
------------------------------------	---

12.6 Endocrine disrupting properties

12.7 Other adverse effects

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Appropriate methods of waste treatment for the product

The product is not covered by the rules on hazardous waste. Swedish Waste Ordinance (2020:614).

Appropriate methods of waste treatment for packaging

The waste category is indicative and depends on how the waste was generated. Packaging containing product residues must be disposed of in the same way as the product.

SECTION 14: Transport information

Dangerous goods

No

14.1. UN number or ID number

Comments

Not dangerous goods according to ADR, IATA and IMDG.

14.2 UN proper shipping name

14.3 Transport hazard class(es)

14.4 Packing group

14.5 Environmental hazards

14.6. Special precautions for user

14.7. Maritime transport in bulk according to IMO instruments

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

15.2 Chemical safety assessment

SECTION 16: Other information

List of relevant hazard statements/H-statements (in Sections 2 and 3)

H226 Flammable liquid and vapour.
H315 Causes skin irritation.
H317 May cause an allergic skin reaction.
