

## SAFETY DATA SHEET

# Chlorhexidine Shampoo

This safety data sheet complies with Commission Regulation (EU) 2020/878 of 18 June 2020 amending Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

|            |            |
|------------|------------|
| Issue date | 04.09.2026 |
|------------|------------|

#### 1.1 Product identifier

|              |                       |
|--------------|-----------------------|
| Product name | Chlorhexidine Shampoo |
|--------------|-----------------------|

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

|             |                     |
|-------------|---------------------|
| Area of use | Shampoo for animals |
|-------------|---------------------|

#### 1.3 Details of the supplier of the safety data sheet

|                  |                                                    |
|------------------|----------------------------------------------------|
| Company name     | Willab AB                                          |
| Visiting address | Hålarpsvägen 15                                    |
| Postal address   | Hålarpsvägen 15                                    |
| Postcode         | 26962                                              |
| City             | Båstad                                             |
| Country          | Sweden                                             |
| Telephone        | 0431445900                                         |
| E-mail           | <a href="mailto:info@willab.se">info@willab.se</a> |
| Website          | <a href="http://www.willab.se">www.willab.se</a>   |

#### 1.4 Emergency telephone number

|                     |                                                |
|---------------------|------------------------------------------------|
| Emergency telephone | Telephone: Telephone: Call 112 in an emergency |
|---------------------|------------------------------------------------|

### SECTION 2: Hazards identification

#### 2.1 Classification of the substance or mixture

|                                                           |           |
|-----------------------------------------------------------|-----------|
| Classification according to (EC) No 1272/2008 [CLP / GHS] | H318,H315 |
|-----------------------------------------------------------|-----------|

#### 2.2 Label elements

**Hazard pictogram (CLP)**

Signal word

Danger

Hazard statements

H318 Causes serious eye damage. H315 Causes skin irritation.

Precautionary statements

P101 If medical advice is needed, have product container or label at hand.  
 P102 Keep out of reach of children. P280 Wear protective gloves / protective clothing / eye protection / face protection.  
 P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
 P310 Immediately call a POISON CENTER or doctor. P332+P313 If skin irritation occurs: Get medical advice/attention.

**2.3 Other hazards**

PBT / vPvB

None.

Other hazards

Not known.

**SECTION 3: Composition/information on ingredients****3.2 Mixtures**

Substance  
 Identification  
 Classification  
 Content  
 Notes  
 Triethanolamine  
 CAS-nr.: 102-71-6  
 EG-nr.: 203-049-8

Additional information 0 -0.1 %

on classification:  
 The product shall not  
 be classified as  
 hazardous according to  
 classification and  
 labelling rules for  
 substances and  
 mixtures.

Chlorhexidine digluconate  
 CAS-nr.: 18472-51-0

 exemption from  
 registration pursuant to  
 Article 2.7  
 b

subject to labelling under  
 regulations for health,  
 environmental and  
 fire hazards.

**SECTION 4: First aid measures****4.1 Description of first aid measures**

Inhalation

Move the person to fresh air and ensure that he or she rests in a position that

|              |                                                                                                                                                                                            |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|              | facilitates breathing. Seek medical attention if discomfort occurs.                                                                                                                        |
| Skin contact | Immediately rinse contaminated skin with water. Remove soaked clothing immediately and continue rinsing. Seek medical attention if discomfort occurs.                                      |
| Eye contact  | Immediately rinse with plenty of water for up to 15 minutes. Remove any contact lenses and keep the eye wide open. If irritation persists: Go to hospital and bring the safety data sheet. |
| Ingestion    | Immediately rinse the mouth and drink plenty of water (200-300 ml). Do not induce vomiting. Seek medical attention if discomfort occurs.                                                   |

## 4.2 Most important symptoms and effects, both acute and delayed

|                              |                         |
|------------------------------|-------------------------|
| General symptoms and effects | Skin and eye irritation |
|------------------------------|-------------------------|

## 4.3 Indication of any immediate medical attention and special treatment needed

|                   |                                            |
|-------------------|--------------------------------------------|
| Other information | Show this safety data sheet to the doctor. |
|-------------------|--------------------------------------------|

## SECTION 5: Firefighting measures

### 5.1 Extinguishing media

|                              |                                            |
|------------------------------|--------------------------------------------|
| Suitable extinguishing media | Water mist, foam, powder or carbon dioxide |
|------------------------------|--------------------------------------------|

### 5.2 Special hazards arising from the substance or mixture

### 5.3 Advice for firefighters

|                                               |                                                               |
|-----------------------------------------------|---------------------------------------------------------------|
| Special protective equipment for firefighters | Use self-contained breathing apparatus in case of heavy smoke |
|-----------------------------------------------|---------------------------------------------------------------|

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

|                      |                                       |
|----------------------|---------------------------------------|
| Personal precautions | Use appropriate protective equipment. |
|----------------------|---------------------------------------|

### 6.2 Environmental precautions

|                           |                              |
|---------------------------|------------------------------|
| Environmental precautions | Avoid discharge into drains. |
|---------------------------|------------------------------|

### 6.3 Methods and material for containment and cleaning up

|             |                                                                                                    |
|-------------|----------------------------------------------------------------------------------------------------|
| Containment | Absorb in vermiculite, dry sand or earth and place in containers.                                  |
| Clean-up    | Collect spill in sealed containers and dispose of in accordance with applicable local regulations. |

### 6.4 Reference to other sections

## SECTION 7: Handling and storage

## 7.1 Precautions for safe handling

|          |                                                                                         |
|----------|-----------------------------------------------------------------------------------------|
| Handling | Avoid inhalation of vapours. Avoid contact with skin and eyes. Ensure good ventilation. |
|----------|-----------------------------------------------------------------------------------------|

## 7.2 Conditions for safe storage, including any incompatibilities

|         |                                                                                                     |
|---------|-----------------------------------------------------------------------------------------------------|
| Storage | Store in a cool and ventilated area. Keep away from food, feed, fertilisers and similar substances. |
|---------|-----------------------------------------------------------------------------------------------------|

## 7.3 Specific end use(s)

|                 |                                |
|-----------------|--------------------------------|
| Substance       | Triethanolamine                |
| Recommendations | Keep out of reach of children. |

# SECTION 8: Exposure controls/personal protection

## 8.1 Control parameters

|                                |
|--------------------------------|
| Substance                      |
| Identification                 |
| Limit values                   |
| Year                           |
| Triethanolamine                |
| CAS-nr.: 102-71-6              |
| Limit value type: OEL          |
| 8-hour exposure limit: 0.8 ppm |
| Short-term exposure limit      |
| Value: 1.6 ppm                 |
| Chlorhexidine digluconate      |
| CAS-nr.: 18472-51-0            |
| Sodium chloride                |
| CAS-nr.: 7647-14-5             |
| Glycerol                       |
| CAS-nr.: 56-81-5               |

## 8.2 Exposure controls

### Eye / face protection

|                         |                                    |
|-------------------------|------------------------------------|
| Suitable eye protection | Tight-fitting safety goggles EN166 |
|-------------------------|------------------------------------|

### Hand protection

|                                           |                                 |
|-------------------------------------------|---------------------------------|
| Skin / hand protection, prolonged contact | Nitrile gloves are recommended. |
|-------------------------------------------|---------------------------------|

### Skin protection

|                              |                                                                          |
|------------------------------|--------------------------------------------------------------------------|
| Suitable protective clothing | Wear suitable protective clothing where there is a risk of skin contact. |
|------------------------------|--------------------------------------------------------------------------|

### Respiratory protection

|                                 |                        |
|---------------------------------|------------------------|
| Respiratory protection, general | Normally not necessary |
|---------------------------------|------------------------|

## Environmental exposure controls

|                                 |                    |
|---------------------------------|--------------------|
| Environmental exposure controls | No comment stated. |
|---------------------------------|--------------------|

# SECTION 9: Physical and chemical properties

## 9.1 Information on basic physical and chemical properties

|                               |                 |
|-------------------------------|-----------------|
| Form                          | Liquid          |
| Colour                        | Colourless.     |
| Odour                         | Mild.           |
| pH                            | Value: 6 - 7    |
| Melting point / melting range | Value: ~ 0 °C   |
| Freezing point                | Value: ~ 0 °C   |
| Boiling point / boiling range | Value: ~ 100 °C |

## 9.2 Other information

### 9.2.2 Other safety characteristics

|          |         |
|----------|---------|
| Comments | No data |
|----------|---------|

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

|            |                    |
|------------|--------------------|
| Reactivity | No comment stated. |
|------------|--------------------|

### 10.2 Chemical stability

|           |                                                                           |
|-----------|---------------------------------------------------------------------------|
| Stability | Stable when stored under normal conditions and in the original packaging. |
|-----------|---------------------------------------------------------------------------|

### 10.3 Possibility of hazardous reactions

### 10.4 Conditions to avoid

|                     |                           |
|---------------------|---------------------------|
| Conditions to avoid | Avoid frost and high heat |
|---------------------|---------------------------|

### 10.5 Incompatible materials

### 10.6 Hazardous decomposition products

## SECTION 11: Toxicological information

### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

|                |                                                                |
|----------------|----------------------------------------------------------------|
| Substance      | Triethanolamine                                                |
| Acute toxicity | <b>Tested effect: LD50</b><br>Value: 6400 mg/kg bw<br>al<br>at |

### Other information on health hazards

|              |                                                                |
|--------------|----------------------------------------------------------------|
| Inhalation   | Inhalation of vapour or mist may cause respiratory irritation. |
| Skin contact | May cause an allergic skin reaction.                           |

Eye contact

Direct contact with the eyes may cause temporary irritation.

Ingestion

Ingestion of larger amounts may cause discomfort.

## 11.2 Information on other hazards

# SECTION 12: Ecological information

## 12.1 Toxicity

## 12.2 Persistence and degradability

## 12.3 Bioaccumulative potential

## 12.4 Mobility in soil

## 12.5 Results of PBT and vPvB assessment

## 12.6 Endocrine disrupting properties

## 12.7 Other adverse effects

# SECTION 13: Disposal considerations

## 13.1 Waste treatment methods

# SECTION 14: Transport information

## 14.1 UN number or ID number

## 14.2 UN proper shipping name

## 14.3 Transport hazard class(es)

## 14.4 Packing group

## 14.5 Environmental hazards

## 14.6 Special precautions for user

## 14.7 Maritime transport in bulk according to IMO instruments

# SECTION 15: Regulatory information

## 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

## 15.2 Chemical safety assessment

# SECTION 16: Other information

List of relevant  
hazard statements / H-phrases (in  
Sections 2  
and 3)

H315 Causes skin irritation.  
H318 Causes serious eye damage.  
H400 Very toxic to aquatic life.  
H410 Very toxic to aquatic life with long lasting effects.
